

NANDHAKUMAR M

SENIOR .NET FULL STACK DEVELOPER

+91 80721-27298 | nandhakumarmurugesan45@gmail.com | Namakkal, Tamil Nadu, India | Open to Relocate: Hyderabad / Bangalore / Coimbatore / Chennai

LinkedIn: linkedin.com/in/nandhakumar-m-dotnet | GitHub: github.com/Nandhakumarmnk

PROFESSIONAL SUMMARY

Senior .NET Full Stack Developer with **5+ years** of hands-on experience building and maintaining **scalable enterprise applications** using **.NET Core, ASP.NET, ASP.NET MVC, C#, and .NET Core Web API**. Strong in **backend and frontend integration** — designs and consumes **RESTful services** and builds **responsive and dynamic user interfaces** with **JavaScript, jQuery, AJAX, and Bootstrap**. Experienced in **database systems and database migration** on SQL Server, including EF Core migrations, data migration scripts, and environment refreshes. Writes **clean, reusable, and maintainable code**, takes part in **code reviews**, and works with **cross-functional teams in an Agile/Scrum environment**. Uses **AI tools** such as Claude Code and ChatGPT for faster development and better code quality. Strong **problem-solving and communication skills**.

TECHNICAL SKILLS

Backend: C#, .NET Core, ASP.NET Core 8, ASP.NET MVC 5, ASP.NET Web API, .NET Core Web API, .NET Framework 4.8, RESTful Services, REST APIs, Entity Framework Core 8, Entity Framework 6, LINQ, ADO.NET, Dependency Injection, SOLID, Swagger / OpenAPI, Postman, Hangfire

Frontend: JavaScript (ES6+), jQuery, AJAX, TypeScript, HTML5, CSS3, Bootstrap, React, Razor Views, DevExtreme, Responsive Web Design, Dynamic UI, Client-Side Validation, JSON / REST Integration

Database & Migration: SQL Server, T-SQL, Stored Procedures, Views, Triggers, Query Optimization, Indexing, EF Core Code-First Migrations, Schema & Data Migration Scripts, Rollback Scripts, Backup & Restoration, Environment Refresh (Production → UAT / Dev)

Tools & DevOps: Git, TFS, Azure DevOps, IIS Hosting & Administration, Windows Server, SSL / TLS, Release Management, Zero-Downtime Deployment, ELMAH, log4net

Security & Integration: OWASP Top 10, JWT Authentication, ASP.NET Identity, Role-Based Access Control (RBAC), XSS / CSRF Prevention, Parameterized Queries, SAP Integration, SMTP Services, Excel Bulk Upload, DevExpress, Crystal Reports

Practices & AI: Agile / Scrum, Sprint Planning, Code Reviews, Clean Code, Design Patterns, Requirement Analysis, Mentoring, Claude Code, ChatGPT, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Senior .NET Full Stack Developer & Technical Lead

Apr 2023 – Present

Spark IT Tech — Tiruppur, Tamil Nadu

- Build and maintain **scalable enterprise applications** using **.NET Core, ASP.NET, ASP.NET MVC, and .NET Core Web API**.
- Design and consume RESTful services** secured with JWT and documented using Swagger.
- Build **responsive and dynamic user interfaces** using **JavaScript, jQuery, AJAX, and Bootstrap**.
- Perform and support database migration activities** — EF Core migrations, schema and data scripts, and environment refreshes.
- Write **clean, reusable, and maintainable code** and run regular **code reviews** to keep standards consistent.
- Work with **cross-functional teams in an Agile/Scrum environment** — sprint planning, daily stand-ups, and demos.
- Fixed **500+ security issues** (XSS, SQL Injection, CSRF) on a live production system without business downtime.
- Deploy releases on IIS with **zero downtime** and support QA, UAT, and business teams after go-live.
- Use **Claude Code and ChatGPT** for AI-assisted development and code review across the team.
- Mentor junior developers on .NET best practices, secure coding, and SQL tuning.

.NET Full Stack Developer

Aug 2021 – Mar 2023

Spark IT Tech — Tiruppur, Tamil Nadu

- Developed procurement and inventory modules on **ASP.NET MVC and .NET Core** for high-volume daily transactions.
- Built **.NET Core Web APIs** with JWT authentication, versioning, and Swagger documentation.
- Built frontend screens with **JavaScript, jQuery, and Bootstrap**, using AJAX calls to load data without page reloads.
- Tuned **T-SQL stored procedures and indexes** to achieve sub-second response times.
- Ran **database migration and patch scripts** for each release along with rollback scripts.
- Created Excel bulk upload modules with validation and SAP sync logic.
- Set up Hangfire background jobs with retry and monitoring for long-running tasks.

KEY PROJECTS

Enterprise Supply Chain & Procurement System | Technical Lead

C#, .NET Core, ASP.NET MVC, Web API, Entity Framework, SQL Server, JavaScript, jQuery, Bootstrap, JWT, IIS

- Built a multi-module **enterprise application** for procurement, inventory, and supply chain operations.
- Designed the **RESTful Web API** layer with JWT authentication, versioning, and Swagger documentation.
- Built the dynamic UI in **JavaScript and jQuery** — AJAX grids, cascading dropdowns, and modal forms.

Vendor Portal | Full Stack Developer

C#, .NET Core, ASP.NET MVC, Web API, Entity Framework, SQL Server, ASP.NET Identity, JWT, React, JavaScript, jQuery, Bootstrap

- Streamlined **communication, procurement, and collaboration** with suppliers through a single self-service portal.
- Built the vendor-facing UI in **React** — registration and onboarding with user authentication and role-based approval flows.
- Delivered reporting screens for purchase orders, invoices, and vendor activity tracking.

Smart Documents — Invoice & Document Management | Full Stack Developer

C#, ASP.NET MVC 5, Web API, Entity Framework 6, ADO.NET, SQL Server, ASP.NET Identity, DevExpress, JavaScript, jQuery

- Built a configurable document engine so new document types can be added without code changes.
- Delivered **SAP Business One integration** for invoice and vendor master data.
- Fixed 65 **code review** issues across 37+ files and reduced database queries by around 50%.

Work Flow Segregation | Technical Lead

C#, .NET Core, Web API, Entity Framework, SQL Server, T-SQL, Query Optimization, Claude Code

- Split the centralized **Work Flow Engine** into segregated modules to remove processing bottlenecks.
- Improved **application and database performance** by isolating workflow data and reducing contention.
- Delivered the refactor using **Claude Code** for AI-assisted analysis and safe code migration.

Database Migration & Release Management | Release Owner

SQL Server, T-SQL, EF Core Migrations, IIS, Windows Server, Azure DevOps, Git

- Handle **EF Core migrations**, schema and data migration scripts, and matching rollback scripts.
- Perform SQL Server backup, restore, and **production-to-UAT environment refreshes** with data validation.
- Manage IIS hosting, SSL setup, and zero-downtime release deployment.

SAP Synchronization Services | Backend Developer

C#, .NET Core, Web API, Hangfire, SAP Integration, SQL Server

- Built SAP sync services from scratch using Hangfire for near real-time data exchange.
- Automated two-way data flow, removing manual reconciliation between teams.
- Added retry, failure alerts, and monitoring so failed jobs recover automatically.

School Management System — IROOTS, Bangalore | Full Stack Developer

C#, ASP.NET Core, .NET Core Web API, Entity Framework Core, SQL Server, JavaScript, jQuery, Bootstrap

- Built modules for a **school management platform** for IROOTS, Bangalore (Jun 2025 – Aug 2025).
- Delivered the engagement end to end — requirement analysis, development, deployment, and support.

Order & Inventory Platform | Full Stack Developer

C#, ASP.NET Core 8, EF Core 8, SQL Server, PDF Generation, Excel Export

- Built an order and inventory platform on **ASP.NET Core 8, EF Core 8, and SQL Server** with PDF invoices, Excel export, and dashboards.
- Handled **EF Core migrations**, database backup and restore, and data migration for every release.

KEY ACHIEVEMENTS

- Fixed **500+ security vulnerabilities** on a live enterprise platform, aligning it with OWASP Top 10 standards.
- Built **SAP integration** from scratch, removing repeated manual reconciliation work.
- Achieved **sub-second response times** on high-volume modules through SQL tuning.
- Delivered **zero-downtime production releases** with no SLA breaches.

EDUCATION

Bachelor of Engineering (B.E.) — Electrical & Electronics Engineering

2016 – 2020

Karpagam College of Engineering — CGPA: 7.5 / 10

PROFESSIONAL DEVELOPMENT

Currently upskilling in **Azure Cloud, Docker, and CI/CD pipelines** (strong JavaScript and TypeScript foundation already in place).

Languages: Tamil (Native / Bilingual) | English (Professional Working Proficiency)
